# Eha-Mat

EHA-MAT is manufactured in a special synthetic material with fungicide and bacteriostatic characteristics. It therefore avoids the proliferation of microorganisms. It is easily washable and offers very high resistance to chemicals agents. The anti-slip material guarantees an optimal seal on both the flooring and on the top part, in contact with the users. The grating pattern allows for an immediate outflow of water. It meets safety standards German anti-slip GUV No. 2617/DIN 51097 (Group A test). The very high strenght material guarantees to EHA-MAT almost an unlimited lifetime, from both the point of view of the colors and that one of degradation of the material itself. Available in rolls.
