The human company for future generations for our eyes

Essere un’azienda umana significa per noi porre al centro delle nostre politiche, strategie e pratiche quotidiane il benessere, lo sviluppo e l’importanza delle persone.
È sia un impegno verso il futuro sia un’attenzione immediata alla bellezza e alla qualità del design.
Una visione che guarda avanti, preoccupandosi dell’eredità lasciata alle generazioni future, ma che è anche profondamente radicata nel presente, nel ‘vedere’ e nel valutare ciò che ci circonda.
Responsabilità, estetica e un senso di comunità attraverso il tempo, con un impegno per il design e la sostenibilità.

We believe that being a company with a human touch means placing the wellbeing, development and importance of people at the centre of our policies, strategies and daily practices. It is both a commitment to the future and a way of immediately focusing on beauty and design quality. An innovative vision, concerned about the legacy that will be left to future generations and yet also deeply rooted in the present, in looking at and examining the world around us. Responsibility, aesthetics and a sense of community across time, with a commitment to design and sustainability.

L’azienda

Fit Interiors, marchio di Gruppo P&G Srl, è un’azienda a conduzione familiare fondata nel 1978 nella Wellness Valley italiana, specializzata nella produzione di mobili su misura in legno.
Negli anni ‘90, l’azienda ha iniziato a collaborare con realtà di primo piano nel settore fitness e tempo libero, concentrandosi sulla realizzazione di arredi per spogliatoi e soluzioni di storage.
Negli anni successivi, e soprattutto a partire dalla seconda decade degli anni 2000, Fit Interiors ha investito molto per ampliare la propria produzione, estendendosi progressivamente a settori come fitness, benessere, hotel, musei e uffici.
Il punto di forza dell’azienda risiede nella capacità di progettare arredi funzionali e di grande valore estetico, con particolare attenzione a soluzioni innovative per armadietti e contenitori per abiti e oggetti personali. La capacità di creare ambienti moderni e adattabili a ogni stile, unita all’integrazione tra arredo e tecnologia, insieme a una solida esperienza gestionale e a una costante attenzione al design, ha reso Fit Interiors un punto di riferimento nel mercato italiano e internazionale.

La nostra mission

Design e sostenibilità

Siamo un’azienda dove il design viene prima di tutto, cercando di operare in modo sostenibile nel realizzare prodotti belli, utili, attenti all’ambiente e che durino nel tempo, con l’obiettivo di preservare le risorse naturali della terra, per oggi e per le generazioni future.

Sicurezza e salute

I nostri valori mettono al centro il capitale umano, per questo ci impegniamo a proteggere la sicurezza e la salute dei nostri dipendenti, dei nostri clienti e dei loro clienti, utilizzando materiali certificati e sicuri ed operiamo nel rispetto dei più elevati standard in conformità a tutte le leggi.

Rispetto e professionalità

Trattiamo tutti i nostri dipendenti e partner con professionalità, dignità e rispetto. Vogliamo ambienti e relazioni di lavoro che aiutino tutti a contribuire al raggiungimento degli obiettivi in modo innovativo ed eccellente.

The company

Fit Interiors, a brand of Gruppo P&G Srl, is a family-run company founded in 1978 in Italy’s Wellness Valley, specializing in the production of custom wooden furniture. In the 1990s, the company began collaborating with leading businesses in the fitness and leisure sector, focusing on the creation of locker room furniture and storage solutions. In the following years, and especially from the second decade of the 2000s onwards, Fit Interiors invested heavily to expand its production, progressively extending into sectors such as fitness, wellness, hotels, museums, and offices. The company’s strength lies in its ability to design functional and aesthetically valuable furniture, with particular attention to innovative solutions for lockers and storage units for clothing and personal items. Its ability to create modern environments adaptable to any style, combined with the integration of furniture and technology, along with solid management experience and a constant focus on design, has made Fit Interiors a key player in both the Italian and international markets.

Our mission

Design and sustainability

We are a company where design comes first, striving to operate sustainably in making products that are beautiful, useful, environmentally friendly and long-lasting, with the aim of preserving the earth’s natural resources, for the present and for future generations.

Health and safety

Our values put human capital at the centre, which is why we are committed to protecting the safety and health of our employees, our customers and their clients, using certified and safe materials and operating to the highest standards in compliance with all laws.

Respect and professionality

We treat all our employees and partners with professionality, dignity and respect. We want working environments and relationships that help everyone to contribute to the achievement of our goals in an innovative and excellent way.

timeline

Mobilificio P&G

1978

1989

• Inizia la collaborazione con Bcube e la produzione di armadi per il mondo fitness.
• Collaboration with Bcube and the production of lockers for the fitness world begins.

1994

• Vengono prodotti gli armadi progettati da Giugiaro Design
• The lockers designed by Giugiaro Design are produced.

2006

• L'azienda si trasferisce nel nuovo stabilimento produttivo a Longiano
• The company moves to the new production facility in Longiano.

• The "Futura Wood" line designed by architect Franco Scaglia wins the Red Dot Award /Product Design 2024.

reddot winner 2024

• Nasce la nuova linea di armadi per ufficio, dagli smart lockers alle diverse soluzioni di storage, che unisce design e funzionalità.
• A new line of office lockers is born, from smart lockers to various storage solutions, combining design and functionality.

2025

• Viene ottenuta la certificazione FSC™ (FSC-C210671). Il Forest Stewardship Council™(FSC™) è un'organizzazione globale senza fini di lucro dedicata alla promozione della gestione responsabile delle foreste del mondo.
• The FSC™ (FSC-C210671) certification is obtained. The Forest Stewardship Council™ (FSC™) is a global non-profit organization dedicated to promoting the responsible management of the world's forests.

Certificazione FSC™ / FSC™ Certification

Il **Forest Stewardship Council™(FSC™)** è un'organizzazione globale senza fini di lucro dedicata alla promozione della gestione responsabile delle foreste del mondo. **FSC™** definisce standard basati su principi riconosciuti di gestione responsabile delle foreste, che sono supportati da operatori attivi in campo ambientale, sociale ed economico. Per saperne di più, visita il sito www.fsc.org
La **certificazione FSC™** rappresenta il principale meccanismo di garanzia sull'origine del legno o della carta. Con questa certificazione, il Gruppo P&G non solo dimostra il proprio impegno nei confronti dell'ambiente, ma sottolinea anche la sua adesione a principi di responsabilità sociale.
La **politica** Gruppo P&G **/ Fit Interiors** è di promuovere una gestione delle foreste non solo rispettosa dell'ambiente e economicamente sostenibile, ma anche socialmente utile. Ciò significa garantire vantaggi reali per le comunità locali e lavoratori, assicurando **condizioni di lavoro dignitose, sicurezza sul posto di lavoro** e il rispetto dei **diritti fondamentali dei lavoratori**, come la libertà di associazione e la possibilità di contrattare collettivamente.
Con la certificazione **FSC™**, Gruppo P&G contribuisce a costruire una catena di approvvigionamento più equa e trasparente, dove i diritti di tutti i soggetti coinvolti sono tutelati. L'azienda si impegna a garantire che nella sua catena di fornitura non venga utilizzato **lavoro minorile**, **lavoro forzato** o altre forme di **sfruttamento.**

Acquistando prodotti certificati FSC™ contribuisci a prenderti cura delle foreste del mondo (www.fsc.org).

The Forest Stewardship Council™ (FSC™) is a global non-profit organization dedicated to promoting responsible forest management worldwide. FSC sets standards based on recognized principles of responsible forest management, supported by active environmental, social, and economic stakeholders. To learn more, visit www.fsc.org.
FSC™ certification is the leading guarantee mechanism for the origin of wood or paper.
With this certification, the Gruppo P&G not only demonstrates its commitment to the environment but also emphasizes its adherence to principles of social responsibility.
The **policy of Gruppo P&G / Fit Interiors** is to promote forest management that is not only environmentally friendly and economically sustainable but also socially beneficial. This means ensuring tangible benefits for local communities and workers, providing **dignified working conditions**, **workplace safety**, and respect for **fundamental workers' rights**, such as freedom of association and the ability to engage in collective bargaining.
With **FSC™** certification, Gruppo P&G contributes to building a fairer and more transparent supply chain, where the rights of all stakeholders are protected.
The company is committed to ensuring that its supply chain does not involve **child labor**, **forced labor**, or other forms of **exploitation**.

By purchasing FSC™- certified products, you are helping to take care of the world's forests (www.fsc.org).

Futura Office

Futura Office rappresenta una scelta di design raffinato ed elegante, concepita per ambienti prestigiosi ed esclusivi. Il suo stile distintivo unisce l'estetica naturale dei pannelli in legno a doghe con la resistenza e la durabilità dell'alluminio, creando un equilibrio perfetto tra bellezza e funzionalità. È disponibile sia nella versione con doghe in legno naturale che in quella in MFC (Melamine-Faced Chipboard) con una varietà di finiture.
Un elemento chiave di tutti gli armadi è la grande maniglia, che può essere dotata di serrature integrate, aggiungendo un tocco di modernità e garantendo al contempo sicurezza e affidabilità. Gli armadietti sono equipaggiati con serrature a chiave con snodo, cerniere ammortizzate e sono compatibili con serrature smart e digitali di prossimità, oltre ad adattarsi alle tradizionali serrature meccaniche.
La linea comprende diverse tipologie di armadi, disponibili in versioni a singola o doppia colonna, alti o bassi, ideali sia per l'archiviazione sia per la custodia di oggetti personali. Tutti gli armadi possono essere abbinati ai mobili complementari delle linee Open e Pure, che includono armadi con cestino portarifiuti integrato, scaffalature a vista e moduli con nicchie dotate di schienale imbottito o in legno, oltre a sedute imbottite. Questi elementi sono progettati per adattarsi a vari ambienti di un ufficio, dai contesti direzionali alle sale riunioni o zone operative, garantendo sempre praticità e uno stile elevato.

La versione in legno a doghe ha vinto il **Red Dot Award 2024** nella sua categoria

reddot winner 2024

Futura Office represents a refined and elegant design choice, conceived for prestigious and exclusive environments. Its distinctive style combines the natural aesthetics of slatted wood panels with the strength and durability of aluminum, creating the perfect balance between beauty and functionality. It is available in both natural wood slats and MFC (Melamine-Faced Chipboard) versions with a variety of finishes.
A key feature of all lockers is the large handle, which can be equipped with integrated locks, adding a touch of modernity while ensuring security and reliability. The lockers are fitted with pivoting key locks, soft-close hinges, and are compatible with smart locks and proximity digital locks, while also accommodating traditional mechanical locks.
The collection includes various types of lockers, available in single or double-column versions, tall or low, making them ideal for both storage and the safekeeping of personal items. All lockers can be paired with complementary furniture from the Open and Pure lines, which include lockers with integrated waste bins, open shelving, and modules with niches featuring padded or wooden back panels, as well as padded seating. These elements are designed to adapt to various office settings, from executive areas to meeting rooms or operational zones, always delivering practicality and elevated style.

The slatted wood version received the prestigious **Red Dot Award 2024** in its category.

Agora

La linea Agora propone una vasta gamma di soluzioni, sia in termini di colori che di finiture, risultando estremamente versatile e adattabile a diverse esigenze. Gli armadietti sono dotati di serrature a chiave con snodo e cerniere ammortizzate, compatibili con tutte le principali tipologie di serrature smart e digitali di prossimità, oltre a integrarsi perfettamente con serrature meccaniche tradizionali.
La collezione comprende diverse tipologie di armadietti in MFC (Melamine-Faced Chipboard), disponibili in versioni a singola o doppia colonna, alti o bassi, ideali sia per l'archiviazione che per la custodia di oggetti personali. Tutti gli armadietti possono essere abbinati ai mobili complementari delle linee Open e Pure, che includono armadietti con cestino portarifiuti integrato, scaffalature a vista e moduli con nicchie dotate di schienale imbottito o in legno, oltre a sedute imbottite.
La varietà delle combinazioni e la modularità dei vari elementi garantiscono una soluzione funzionale e coordinata, ideale per soddisfare ogni esigenza di archiviazione e organizzazione in ufficio.

Zenith

La linea Zenith si distingue per l'originale sagomatura dell'anta, che presenta un'apertura nella parte superiore, ideale per l'inserimento di lettere e documenti. Questa soluzione estetica è accompagnata da una vasta gamma di colori e finiture, che spaziano dalle tonalità più sobrie a quelle più vivaci, per soddisfare le diverse esigenze di stile e design degli ambienti.
Gli armadietti sono dotati di serrature a chiave con snodo e cerniere ammortizzate, compatibili con tutte le principali tipologie di serrature smart e digitali di prossimità, oltre ad adattarsi perfettamente alle tradizionali serrature meccaniche. La gamma comprende diverse tipologie di armadietti in MFC (Melamine-Faced Chipboard), disponibili in versioni a singola o doppia colonna, alti o bassi, ideali per la custodia di oggetti personali. Tutti gli armadietti possono essere abbinati sia alla linea Agora che agli arredi complementari delle linee Open e Pure.

The Zenith line stands out for the unique shaping of its door, which features an opening at the top, ideal for inserting letters and documents. This aesthetic solution is complemented by a wide range of colors and finishes, ranging from more subdued tones to vibrant ones, catering to diverse style and design needs in various environments.
The lockers are equipped with pivoting key locks and soft-close hinges, compatible with all major types of smart locks and proximity digital locks, while seamlessly integrating with traditional mechanical locks.
The collection includes various types of lockers in MFC (Melamine-Faced Chipboard), available in single or double-column versions, tall or low, making them ideal for storing personal belongings. All lockers can be paired with the Agora line as well as complementary furniture from the Open and Pure lines.

Open

La linea Open è composta da armadietti in MFC (Melamine-Faced Chipboard) in diverse finiture, con scaffalature a vista, nicchie porta-abiti e mobili con cestino portarifiuti integrato. La gamma include diverse tipologie di armadietti, disponibili in versioni a singola o doppia colonna, alti o bassi, ed è progettata per essere compatibile e complementare con tutte le linee: Futura Office, Agora, Zenith e con la linea Pure, dedicata alle sedute.
Grazie alle sue caratteristiche, la linea Open offre un ulteriore livello di flessibilità, consentendo di creare composizioni modulari varie e articolate, perfettamente integrate con le altre linee.

The Open line consists of lockers made of MFC (Melamine-Faced Chipboard) in various finishes, featuring open shelving, garment niches, and units with integrated waste bins. The range includes various types of lockers, available in single or double-column versions, tall or short, and is designed to be compatible and complementary with all lines: Futura Office, Agora, Zenith, and the Pure line, dedicated to seating.
Thanks to its features, the Open line provides an additional level of flexibility, allowing for the creation of diverse and articulated modular compositions that integrate seamlessly with the other lines.

Collective

Ogni anno, milioni di visitatori provenienti da tutto il mondo si recano nei musei per ammirare opere preziose, spesso delicate, custodite in sale ed edifici di grande valore storico e culturale. Per garantire la sicurezza delle opere e gestire in modo ordinato il flusso dei visitatori, è fondamentale predisporre spazi organizzati e funzionali, inclusi quelli dedicati alla custodia di effetti personali come borse, valigette, zaini e capi ingombranti.
All'ingresso dei musei, soprattutto quelli più grandi e importanti, è essenziale disporre di aree attrezzate per questo scopo. La linea Collective risponde a questa esigenza, offrendo soluzioni appositamente studiate per ambienti museali.
Gli armadietti della linea Collective sono realizzati in MFC (Melamine-Faced Chipboard), un materiale che garantisce solidità e affidabilità, mentre le ante in policarbonato trasparente uniscono funzionalità e sicurezza, consentendo un'ispezione visiva immediata del contenuto. Alcuni modelli sono dotati di luci LED integrate nei vani, che migliorano ulteriormente la visibilità.
Disponibili in diverse misure e configurazioni, questi armadietti si adattano perfettamente alle esigenze specifiche di ciascun museo, sia in termini di spazio che di capacità di stoccaggio. Tutti gli armadietti sono dotati di serratura a chiave e una numerazione con adesivo resinato.
Altre tipologie di serrature possono essere selezionate tra varie opzioni: soluzioni meccaniche, elettroniche e serrature smart.

Every year, millions of visitors from all over the world visit museums to admire valuable, often delicate works of art, preserved in rooms and buildings of great historical and cultural significance. To ensure the safety of these works and to manage visitor flow in an orderly manner, it is essential to provide organized and functional spaces, including those dedicated to storing personal belongings such as bags, briefcases, backpacks, and bulky items.
At the entrance of museums, especially larger and more prominent ones, it is crucial to have dedicated areas equipped for this purpose. The Collective line meets this need by offering solutions specifically designed for museum environments.
The lockers in the Collective line are made of MFC (Melamine-Faced Chipboard), a material that ensures durability and reliability, while the transparent polycarbonate doors combine functionality and security, allowing for immediate visual inspection of the contents. Some models are equipped with integrated LED lights in the compartments, further improving visibility.
Available in various sizes and configurations, these lockers perfectly adapt to the specific needs of each museum, both in terms of space and storage capacity. All lockers come with key locks and adhesive resin numbering.
Additional types of locks can be selected from a variety of options, including mechanical, electronic, and smart locks.

Gli armadietti sono disponibili anche
con illuminazione interna e con struttura ignifuga.

The lockers are also available with internal lighting
and a fire-resistant structure.

Division

La linea Division nasce per rispondere alla crescente esigenza delle aziende di dotarsi di spogliatoi adeguati per i propri dipendenti.
In ambienti lavorativi come fabbriche, laboratori e magazzini, è sempre più frequente l'utilizzo di indumenti specifici per il lavoro, rendendo necessario il cambio degli abiti personali con quelli professionali. Questa esigenza si estende anche ad ambulatori, ospedali e altre strutture in cui è richiesto l'uso di divise adatte alle mansioni svolte. Di conseguenza, tutte queste realtà devono essere dotate di ambienti idonei a soddisfare tali necessità. La linea Division è stata ideata proprio per offrire soluzioni di arredo pratiche e funzionali, specifiche per spogliatoi di questo tipo.
Gli armadietti sono realizzati in MFC (Melamine-Faced Chipboard) in diverse finiture e progettati con vani dotati di ripiani portaoggetti e divisori interni. Questi consentono di separare gli abiti personali da quelli da lavoro, evitando possibili contaminazioni e garantendo la pulizia e l'igiene degli indumenti personali. Tutti gli armadietti sono dotati di targhetta portanome, serratura a chiave e una numerazione con adesivo resinato.
Altre tipologie di serrature possono essere selezionate tra varie opzioni: soluzioni meccaniche, elettroniche e serrature smart.

The Division line was created to address the growing need for companies to equip themselves with adequate locker rooms for their employees.
In work environments such as factories, laboratories, and warehouses, the use of specific workwear is increasingly common, making it necessary to change from personal clothing to professional attire. This need also extends to clinics, hospitals, and other facilities where uniforms suitable for specific tasks are required. Consequently, all these workplaces must be equipped with appropriate spaces to meet these needs. The Division line has been designed to provide practical and functional furniture solutions specifically for such locker rooms.
The lockers are made of MFC (Melamine-Faced Chipboard) in various finishes and are designed with compartments featuring shelves and internal dividers. These allow for the separation of personal clothing from work attire, preventing potential contamination and ensuring the cleanliness and hygiene of personal garments. All lockers are equipped with a name tag holder, key lock, and adhesive resin numbering.
Additional types of locks can be selected from various options, including mechanical, electronic, and smart solutions.

Master

Nelle scuole, nei campus e nelle università, è spesso indispensabile fornire agli studenti arredi dedicati alla custodia di oggetti personali come telefoni, computer, libri e dispense. La linea Master è stata sviluppata per soddisfare questa crescente esigenza, offrendo armadietti realizzati in MFC (Melamine-Faced Chipboard), disponibili in diverse finiture e colori. Questo materiale garantisce solidità e affidabilità nel tempo, adattandosi perfettamente all'uso quotidiano.
Ogni armadietto è dotato di una serratura a chiave, e una numerazione con adesivo resinato.
Altre tipologie di serrature possono essere selezionate tra varie opzioni: soluzioni meccaniche, elettroniche e serrature smart.

In schools, campuses, and universities, it is often essential to provide students with furniture dedicated to storing personal items such as phones, laptops, books, and study materials. The Master line has been developed to meet this growing need, offering lockers made of MFC (Melamine-Faced Chipboard), available in various finishes and colors. This material ensures durability and reliability over time, making it perfectly suited for daily use.
Each locker is equipped with a key lock and adhesive resin numbering.
Additional types of locks can be selected from various options, including mechanical, electronic, and smart solutions.

Master Kid

Nella scuola dell’infanzia gli arredi devono essere accoglienti e naturali, preferibilmente realizzati in legno o suoi derivati, come i pannelli in MFC (Melamine-Faced Chipboard), il materiale utilizzato per creare gli armadietti della linea Master Kid.
La linea è stata progettata pensando al contesto educativo e alle esigenze dei più piccoli. Per questo, sia la forma che le dimensioni degli armadietti sono studiate a misura di bambina e bambino, favorendo, nei limiti del possibile, la loro autonomia nella gestione degli oggetti personali, come borse, libri, astucci e indumenti.

In preschools, furniture must be welcoming and natural, preferably made of wood or its derivatives, such as MFC (Melamine-Faced Chipboard) panels, the material used to create the lockers in the Master Kid line.
This line has been designed with the educational context and the needs of young children in mind. For this reason, both the shape and size of the lockers are tailored to be child-friendly, promoting, as much as possible, their autonomy in managing personal items such as bags, books, pencil cases, and clothing.
